Vidyaashram - People's Knowledge Movement

Volunteer

EXPERIENCE

Graduate Software Engineer

American Express, UK
Jan '21 - Present

Part of Cloud Engineering PaaS Team. Delivering turnkey experience for deploying, running and scaling applications on the Enterprise Cloud

Technology Summer Intern

American Express, UK
Jun '19 - Aug '19

Worked with MGM R&D team to build an internal tool for text summarisation using transfer learning. Gained complete agile product experience with full stack development, UX, product planning, design sprints, user-testing, alpha-testing and product pitches.

Research Intern

Indian School of Business
Dec '19 - Aug '20

Coordinated inter-domain analysis of VC firms & patents filed in India using data extracted through LinkedIn, VCC Edge & IP India.

Data Science Intern

Lumata Digital, New Delhi
Jun '17 - Jul '17

Implemented an n-gram sentiment analysis on search text based on username or hashtag that led to over 80% accurate sentiment detection of text and emoticons.

Software Engineering Intern

Authbase, Hyderabad
Aug '16 - Dec '16

Fabricated the admin interface for the vulnerability search engine. Optimized the breadcrumb model to streamline the user navigation and reduce bounce rates to 30%.

Teching Assistant

IIIT Hyderabad & NPTEL

Courses: IT Workshop 1&2 | Big Data & Policing | Music Mind & Tech | Privacy and Security in Online Social Media

Mentored 900+ undergraduate students, teaching them scripting, web frameworks, data science & application security

PUBLICATIONS

"Exploring Shifts in Online Political Discourse: A Study of the 2014 and 2019 National Elections in India"
EPSA, Prague

"Analysing how the Shift in Discourses on Social Media affected the Narrative around the Indian General Election 2019"
RSSCONF, Vienna

PROJECTS

2019 Indian General Elections in the Public Space

Designed a real-time visualization portal for the Indian General Elections 2019 that provides analysis through Data Science tools as well as sociological methods to study the various discourses around the elections on Twitter.

Location-based privacy on Strava

Developed an App that predicts the address of an user (within a 50m radius) through their publicly shared routes on the fitness social network - Strava

Designing sub-systems

Redesigned the architecture of an existing codebase using Gang of Four Design patterns, along with coupling, cohesion and elimination of bad code smells
