Education

International Institute of Information Technology, Hyderabad
2015 - 2020
B.Tech in Computer Science and MS by Research in Exact Humanities

Work Experience

Research Intern June 2018 - Present
Indian School of Business, Hyderabad
Data mining and inter-domain analysis of i) venture capital firms and ii) filing of patents in India.

Web Administrator July 2018 - Present
IIIT, Hyderabad Prof. Abijit Mitra
Responsible for overhaul of frontend UI/UX of various websites under the professor and eventual migration to newer frameworks.

Data Analytics Intern June 2017 - July 2017
Lumata Digital, Noida
Designed and implemented sentiment analysis to use n-grams which led to over 80% accurate sentiment detection of text and emoticons on search text based on hashtag or username.

Software Development Intern Aug 2017 - Dec 2017
Authbase, Hyderabad
Worked on designing and developing the frontend for a vulnerability search engine and an admin dashboard for Authbase, a NASSCOM 10K startup.

Teaching Assistant Aug 2017 - May 2018
IIIT, Hyderabad IT Workshop-1 & IT Workshop-2
Teaching undergraduate students python scripting, bash scripting, web development, introduction to networking and application security and web frameworks.

Linux Team Member | FOSSASIA Apr 2017
Worked on developing Google-like frontend for susper search engine.

Technical Skills

Programming & Scripting:

C/C++, Python, JavaScript, R HTML5, PHP

Web Frameworks:

Web2py, Django, NodeJS, Bootstrap

Others:

MySQL, Git, Selenium, MVC, SDLC, Linux, Lucene, BaseX, OpenGL3

Positions of Responsibility

Student Placement Coordinator	IIIT H	2018
Core Team member	Felicity, IIIT H	2016
Academic Help Cell Coordinator	IIIT H	2017
Cultural Representative	IIIT H	2016
Apex Member	IIIT H	2017
Constitution Drafting Committee	IIIT H	2016

Major Projects

Twitter Sentiment Analysis May 2018
Comparative study of the normalized sentiment score using maximum entropy, naive bayes, kernel SVM. Used POS-tagging and stemming) to improve the results of the classifiers.

2017 Gujarat Elections in the Public Space Apr 2018
Analyzed the discourses on print and social media (Twitter) to find out the differences and similarities between the issues discussed during the course of Gujarat Elections 2017

Mortality Prediction of ICU Patients Dec 2017
Prediction of likelihood of mortality of ICU patients given time series data of vital statistics. The project was a comparative study of different machine learning methods and their utility in this task.

Improving Parsing Using Distributional Semantics Aug 2017
Improved capabilities of a traditional CYK Parser so that it could handle unknown words using distributional semantics to create a word embedding.

Projects

Mini Shell Aug 2017
Developed a mini shell which would support all basic linux commands, background processes and signal handling along with avoiding zombie processes.

Mini SQL Engine Aug 2017
Developed a mini SQL engine in Python which was able to parse queries and perform basic SQL operations such as SELECT, FROM, WHERE along with aggregate and JOINS.

Automatic File Syncing System Apr 2017
Developed a system which would keep two directories in sync with each other by keeping track of file creation, updation and deletion in any of them.

Proxy Server Apr 2017
Developed a python based HTTP-Proxy Server capable of handling requests between multiple clients and servers.

Ultimate 4x4 tic-tac-toe bot Jan 2017
Developed an Ultimate 4x4 tic-tac-toe bot using minimax search and alpha beta pruning technique. Also a heuristic was developed based on various board positions

Achievements

Amazon Hackathon	Amazon	2017
Pratibha Scholarship	Aditya Birla Group	2015 - Present
Student of the Year	G.G. International School	2015,13
South Asian Finalist	Horlicks Wizkids	2014
Kaladeep Scholarship	G.G. International School	2013
Star Correspondent	Times of India	2013

Social Cause

Founder | Vaatsalya, A drive against child sexual Abuse
